To whom it may concern,

I have a Reichert SPR instrument in my laboratory. We purchased our SR7000 several years ago. Since that time, we have added an autosampler to assist in our experimental design and sample handling. We have carried out protein-protein interaction studies as well as protein-carbohydrate studies. We have published our work in the journal Protein Science among others.

I am very satisfied with the instruments and the support provided.

Sincerely,

Julia Oxford
Associate Professor of Biological Sciences
